Drishyamitra: AI-Powered Photo Management System

SCENARIO

Effortlessly manage your entire photo collection with AI-powered tools.

	Entice How does someone initially become aware of this process?		Enter What do people experience as they begin the process?		Engage In the core moments of the process, what happens?			Exit What do people typically experience as the process finishes?		Extend What happens after the experience is over?	
Steps What does the person (or group) typically experience?	Search for 'photo management app' online	Read feature feature comparisons	Connect Google Photos and iCloud accounts	Set background sync rules	Navigate to 'Faces' view	Search for 'my dog at sunset'	Create a 'Best of Summer' shared album	Complete a photo organizing task	Receive prompt to merge new faces	Open a automated memory alert of a past vacation	Order photo prints from an organized album
Interactions What interactions do they have at each step along the way? • **People:** Who do they see or talk to? • **Places:** Where are they? • **Things:** What digital touekpoints or physical objects would they use?	Google Search results	Drishyamitra App Store page (iOS/Android)	Login screen	Cloud sync configuration settings	AI face-grouping interface	Smart Search input	Themed album generation	User profile settings page	Optional user feedback screen	Push notification '1 year ago in Paris'	Integration with print-on-demand services
Goals & Motivations At each step, what's a person's primary goal or motivation? ("Help me..." or "Help me avoid...")	Help me find an easy way to sort my messy photos.		Help me set up the cloud sync quickly and safely.		Help me find that one old photo of my grandmother instantly.			Help me confirm the accuracy of new AI face groups.		Help me easily make use of my organized memories	
Positive Moments What steps does a typical person find enjoyable, productive, fun, motivating, delightful, or exciting?		Finding detailed, positive user reviews about AI face tagging.	Receiving a clear 'Welcome' email with a quickstart guide.		Feeling delighted when the AI recognizes friends from an obscure 10-year-old photo.			Satisfaction from seeing thousands of unsorted photos now neatly grouped.		A perfect smart album is generated on your birthday, curated from years of photos.	
Negative Moments What steps does a typical person find frustrating, confusing, angering, costly, or time-consuming?	Confused by a cluttered pricing table.		Battery drain during the initial background photo indexing		Search query for 'my dog' fails to return any results.			Too many generic pop-up notifications after app closes		Long-term cloud storage costs become prohibitive.	
Areas of Opportunity How might we make each step better? What ideas do we have? What have others suggested?	Offer a limited-time free full-feature trial to new users.		Clear data privacy and security certifications visible on the landing page.			Add object-based filtering criteria (e.g., specific objects in the scene).		Create a before-and-after visualization of user photo organization.		Create family shared photo vaults that can be jointly organized.
