Define CS, fit into CC

1. CUSTOMER SEGMENT(S) CS

Broad base of digital camera and smartphone users (especially parents, travelers, photography hobbyists, and family historians).

6. CUSTOMER CONSTRAINTS CC

Limited time to organize; limited technical skill for manually tagging large data sets; concerns over data privacy; budget constraints for high cloud storage costs; diverse device and format compatibility.

5. AVAILABLE SOLUTIONS AS

Manual folder hierarchies; External hard drives; Google Photos; iCloud; basic desktop apps (e.g., Apple Photos, Windows Photos); basic manual tagging services.

Pros: widespread access; some automatic categorization.

Cons: Limited AI, hard to search with precise details, storage limits, manual effort.

Explore AS, differentiate

Focus on J&P, tap into BE, understad RC

2. JOBS-TO-BE-DONE / PROBLEMS J&P

Help me find specific memories (e.g., specific people, events, objects).
Help me eliminate duplicate photos.
Help me avoid manually tagging thousands of images.
Help me avoid photo clutter.

9. PROBLEM ROOT CAUSE RC

Technical limitation of older/basic photo management tools: inability to understand contextual narrative, reliance on keyword matching over semantic search, search, lack of scalable compute for advanced object/face detection at ingestion.

7. BEHAVIOUR BE

Customers create complex manual folder hierarchies; pay for excessive cloud storage; use multiple photo storage accounts (i.e. free tier stacking); rely on time-consuming manual searches; procrastinate organizing and just keep accumulating photos.

Focus on J&P, tap into BE, understad RC

Identify strong TR & EM

3. TRIGGERS TR

Running out of photo storage; receiving a photo-almost-full warning; needing to find a specific photo for an upcoming event (e.g., anniversary); data loss fear from an older device; seeing friends use other smart photo apps.

4. EMOTIONS: BEFORE / AFTER EM

Before: (e.g., overwhelmed by clutter; frustrated by slow search; anxious about losing a memory); i.e., "My photo collection is a mess and I'm stressed about it."

After: (e.g., relieved to find photos; confident that memories are safe; excited to share curated albums); i.e., "I can find any photo instantly and my history is safe."

10. YOUR SOLUTION SL

Idea / Solution description:

Drishyamitra is a comprehensive, cloud-based platform and mobile application.

Key Features: Automated ingestion, advanced computer vision and NLP; face, object, scene, and event tagging; context-aware clustering; smart multi-modal search (text & voice, multi-lingual) for precise narrative context (e.g. 'me and Sarah at the beach'); duplicate detection; automated album curation.

Novelty: context-aware narrative context. Support for private tagging and multiple languages.

8. CHANNELS OF BEHAVIOUR CH

8.1 ONLINE

Searching for 'photo organizing tools'; reading reviews; downloading the Drishyamitra mobile app; accessing the web portal; paying for cloud storage.

8.2 OFFLINE (limited for digital photos)

Ordering physical prints from curated albums; showing family organized digital collections.
